## PROJECT

---

### Online Weather report(Only using frontend tools)

An Online Weather Report project that fetches real-time weather data using a weather API and displays it with an interactive UI. Built with HTML, CSS, and JavaScript, it features search functionality for different cities. The project showcases temperature, humidity, wind speed, and weather conditions in a visually appealing format.

### StayEase – A Vacation Rental Platform(Full-stack project)

StayEase is a full-stack web application similar to Airbnb, allowing users to list, search, and book vacation rentals. It includes user authentication, property listings, booking management, and payment integration.
